

IT-NYSDOT-UAS-DATA-SECURITY-EXAMPLE-001 (v1.0)

DISCLAIMER OF AFFILIATION:

NYSDOT is referenced solely as a hypothetical example. NYSDOT has no affiliation with, does not endorse, and did not participate in the creation of this Intelligence Token.

All material is illustrative for demonstrating the PCGI Intelligence Token Framework.

Issued by: Palisades Consulting Group, Inc. (PCGI)

Status: Demonstration Example — Not an official NYSDOT document.

Purpose:

This Intelligence Token establishes NYSDOT-specific controls to prevent bridge-inspection data collected by sensing equipment, including drones, from being transmitted to foreign data centers.

Chunk 001 – Purpose & Authorities (Illustrative Only)

NYSDOT adopts this Intelligence Token solely as an example to demonstrate controls preventing bridge-inspection data from being transmitted to foreign data centers. (Not official.)

Chunk 002 – Policy Statement & Network Restrictions

All sensing equipment used for NYSDOT bridge inspections must operate in offline, local-only mode at all times. (Illustrative only.)

Chunk 003 – Firmware, Data Handling, Cloud Rules

NYSDOT requires local-only storage during collection and bans all foreign cloud services. (Illustrative only.)

Chunk 004 – Enforcement & Approvals

Hypothetical enforcement mechanisms for demonstration purposes only.

Chunk 005 – Contractor Certification Requirements

Vendors and contractors must certify offline-only operation and no foreign cloud use. (Illustrative only.)

Chunk 006 – Storage & Reporting

Data must remain on NYSDOT/NYS-approved storage systems. (Illustrative only.)

Chunk 007 – Data Flow Diagram (Illustrative)

[ASCII diagram omitted for this demo environment.]

Chunk 008 – Legal Constraints

References to NYS laws are illustrative only and do not represent official NYSDOT policy.
